The initials are in black on the 1c and in red on the 2c. An alkali was used on the 4c stamps, which, destroying the color of the paper, caused the initials to appear to be written in white.

Uninitialed stamps are remainders, few sheets having been found.

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 127 in the regular postage section, Scott J1 in the postage due section.

Values for unused stamps are for examples with original gum as defined in the catalogue introduction. Very fine examples of Nos. 1-37 will have perforations touching the design on at least one side due to the narrow spacing of the stamps on the plates. Stamps with perfs clear of the design on all four sides are extremely scarce and will command higher prices.
